Release 3.0 Details

Friday, November 21, 2025

This 3.0 version now includes Patent Trial and Appeal Board datasets, where you can search, view, and extract trials, appeals, and interferences information!

Patent Trial and Appeal Board has the below capabilities: :

- Migrated all of the PTAB Proceedings data from the Developer Hub Patent Trial and Appeal Board (DH PTAB) to Open Data Portal Patent Trial and Appeal Board (ODP PTAB), from 1997 to the present. The migrated data includes Patent Trials (Trial Proceedings, Trial Decisions, Trial Documents), Appeals and Interferences data.
- PTAB datasets and the publicly available information has not changed, but the interface and functionality of the new ODP provide an improved user-centered experience.
- Users can use the Global Search Parameters to search across Trials, Appeals, and Interferences simultaneously.
- The updated refined search feature enables users to search within a data set and download the search results in bulk, across the proceedings type: Trial Proceedings, Trial Decisions, Trial Documents, Appeals, and Interferences, while linking the search to the Patent File Wrapper (PFW) data.
- Click here to see the APIs for Trials, Appeals, and Interferences: https://data.uspto.gov/apis/ptab-trials/search-proceedings
- DH-PTAB will remain available until the decommission date is announced and it will be fully replaced with ODP PTAB.
- Reference our PTAB Transition Guide to help you make the transition from the previous DH-PTAB datasets to ODP's new PTAB feature: https://data.uspto.gov/apis/transition-guide/ptab
- Improved API response:
  - Click here to see the ODP API changes for release 3.0
